

Don't risk poor quality waterproofing

EXTERNAL WATERPROOFING - INDUSTRY BEST PRACTICE

SHORT COURSE: PRACTICAL APPLICATION AND THEORY

2-DAY WORKSHOP

This hands-on practical workshop will provide you with the skills you need to ensure your waterproofing is done right the first time.

Why should you attend?

Waterproofing continues to be the number one defect facing builders in NSW. Up to 50% of recorded building defects are wet area related.

With the average cost of repairs reportedly being between 6 to 10 times the original cost of the work, can you afford to take the risk of having to fix preventable waterproofing defects?

YOU WILL LEARN:

- Current industry best practice standards
- Australian Standards and National Construction Code requirements
- Hands-on practical application of preparing and applying waterproofing membranes for planter boxes, balconies and decks
- How to identify and prevent common reasons for waterproofing failures
- Troubleshooting techniques and best practices applications to prevent defects
- Waterproofing products, their characteristics and compatibilities

WHO SHOULD ENROL?

Builders, renovators, waterproofing applicators, site supervisors, project managers, landscapers, tilers, and plumbers.

OUTCOME

Participants who attend this workshop will be issued a Statement of Attendance.

(Note: this non-accredited course is not suitable for those seeking a contractor waterproofing licence. Please refer to Master Builders Certificate III in Construction Waterproofing for more details.)

PRICE

Member: \$700.00

Non-Member: \$910.00
